Dental Pick V-4108

Ramzan Periodontal Elevator Set Surgical and remodeling dental procedures are increasingly being undertaken in the equine mouth under visual control in the standing sedated patient. Successful removal of deep alveolar root fragments and teeth with fragile dental crowns demands a range of elevators that can be used to access all areas of the mouth and placed with precision alongside dental tissues. These elevators permit the clinician to break down periodontal attachment of both intact and fractures cheek teeth prior to the use of forceps during the extraction process. The pistol grips allow them to be employed with some force to prise dental tissue free from the alveolar wall and insertion to a considerable depth within the socket facilitates complete extraction of teeth with even long reserve crowns. The choice of straight angled and curved blades give the oral surgeon flexibility to deal with teeth throughout the mouth.

Equine Mouth Speculum
V-4401
Rubber Fitted Extra Wide Bite Plates Special rubber layer insertion provides protection against the chipping and slippage of the incisors. The extra wide arms keep the speculum away from the equine's cheek making more working space for the technicians to use various angles to access the horse's mouth. For use with the Millennium speculum, the SE Speculum or the Hausmans.

Equine Mouth Speculum
V-4402
Large Extra Wide Bite Plates Made from premium stainless steel, these bite plates are flat and very deep, making them great for mis-aligned incisors. The extra wide arms keep the speculum away from the equine's cheek making more working space for the technicians to use various angles to access the horse's mouth. For use with Millennium speculum, the SE speculum or the Hausmans.

Equine Mouth Speculum
V-4403
Extra Wide Bite Plates This set of plates due to their semi circle shape prevent the incisors to come off the bite plate. The extra wide arms keep the speculum away from the equine's cheek making more working space for the technicians to use various angles to access the horse's mouth. For use with the Millennium speculum, the SE Speculum or the Hausmans.

Equine Mouth Speculum
V-4404
Made up of polished forged stainless steel. Suitable for both Hausman Speculum and Millennium Speculum.

Equine Mouth Speculum
V-4405
Incisor Bite Plates Specially designed silicon coated plates are suitable for the horses with damaged incisors. For use with the

Equine Mouth Speculum
V-4406
Bite Plates For Pony Speculum Smaller size classical bite plates are specially designed for ponies or miniature breeds. Appropriate for all types of speculum.
Equine Mouth Speculum  
**V-4407**  
SE Speculum with Biothene Straps 6 Ratches A speculum with six ratchets setting for multiple opening options and the extra depth of the ratchets provides extra security to avoid unexpected closing of the speculum whilst on the horse’s mouth. Comes with biothene straps which are flexible, easy to clean and use. Available in normal or extra wide bite plates. This product comes with 10 years guarantee.

Equine Mouth Speculum  
**V-4408**  
Haumann Speculum This four ratchet speculum is ideal for day to day examination and dentistry procedures. The extra depth of the ratchets locks the speculum securely when horse’s mouth is opened. Comes with biothene straps which are waterproof and flexible to use. Available in normal or extra wide bite plates. This product comes with 10 years guarantee.

Equine Mouth Speculum  
**V-4409**  
Millennium Speculum with Biothene Straps Premium quality speculum has deep but small ratchet settings to ensure a comfortable fit on each individual horse. It can be fitted with normal or extra wide bite plates. Comes with hardwearing biothene straps which are water proof and easy to clean. Available in normal or extra wide bite plates.

Equine Mouth Speculum  
**V-4410**  
Pony Speculum with Biothene Straps Ideal for small horses and ponies. This smaller size speculum enables the technicians to work as normal but with more secure fitting.

Equine Mouth Speculum  
**V-4411**  
Comes with ball and pin option. Insert between cheek teeth to hold incisors apart.

Equine Mouth Speculum  
**V-4412**
